Remote Control Panel (RCP)

PRIMARY FUNCTION

A completely customizable device which allows you to remotely control your equipment.

CUSTOM DESIGN

KEEPING YOUR SAFETY IN MIND

With the Arc Flash hazards that exist today, operating our equipment is slipping further from our reach. Dillengr, Inc. can help you design a custom switch panel to remotely control your devices.

SPECIFICATIONS

These units can be installed **several hundred** feet away with increased wire size or communication wiring. We can also design a switching panel based on **remote I/O** using a touch screen for controlling your breakers or motorized switches.
